

PRESS RELEASE

PJH launches cost-efficient shower installation service

(ref: NB-361 / JUNE 2010)

The PJH Group Contracts Division has launched a highly competitive shower enclosure supply and installation service, offering the housing industry same day delivery and installation on a stunning new range of shower doors, called Aquaseries.

The new Aquaseries shower enclosure collection is, as expected from the UK's largest distributor, available from stock; manufactured to exacting standards; and very cost effective.

Furthermore, with over 20 years' experience in supplying and installing a wide portfolio of leading brands of appliances, fires & surrounds to the housebuilder, PJH has become a renowned specialist in the complete project management process, offering tailor made solutions for both public and private housing sectors.

Mike Barnes, managing director of the PJH Contracts Division, said: "The addition of the new Aquaseries shower enclosures to our comprehensive product portfolio opens up a whole new level of cost saving opportunities to the housing constructor. As well as some fantastic introductory rates on shower door installations, we can supply and fit the kitchen appliances, fires/surrounds and showers in the one assignment – so cost efficiencies all round."

The new shower enclosure range includes Pivot, Bifold, Quadrant and Sliding Door models, and has been designed with quality and safety strongly in mind, with FIRA and CE accreditations as well as a five year guarantee. Built to last, the enclosures have been rigorously tested to ensure optimum performance, featuring 5mm toughened safety glass; a solid aluminium frame; and high endurance seals to stand the test of time.

...2

Ease of installation is key for each enclosure within range, with up to 40mm adjustment for out of true walls and a versatile design that can be installed directly onto floor or tray, as well as in a recess or corner situation via the use of a side panel. All the enclosures are power shower and wet room compatible.

The attention to detail and 'feel good' factor hasn't been overlooked either. Finishing touches such as highly polished silver profiles, fixings neatly hidden by colour coordinated caps, chrome plated glass clamps and handles, cushioned magnetic seals and quick release rollers for easy cleaning, enhance the complete enclosure solution.

Mike continued: "Whether you are building or refurbishing, we offer a bespoke service, dedicated to satisfying all requirements and budgets. Our project managers, on-site teams, sales and customer service staff manage the entire process from start to finish, ensuring an efficient operation, communication all the way and minimum site disruption."

For further information on the nationwide supply and installation of the new Aquaseries enclosure range, contact the PJH Group Contracts Division on 08453 720301, installations_team@pjhgroup.com, or visit www.pjhgroup.com
